PROCLEAN GEL

Page 1 to 1

Version 3

1. PRODUCT DESCRIPTION

PROCLEAN GEL a ready to use reclaiming green gel.

Shelf life: 2 years at 20°C.

2. APPLICATION

PROCLEAN GEL is a rapid reclaiming gel particularly recommended for cleaning large vertical screens. Because of its consistency it does not drip and therefore retains its working strength all over the screen. It has no smell, no chlorine and is non-corrosive.

3. USE

Remove all the inks from the screen with a water emulsifiable cleaner. Rinse with water. Dry off the excess water to avoid any dilution of the PROCLEAN GEL.

Evenly spread the gel on both sides of the screen using the brush. Leave for about five minutes and wash off with a high pressure water jet. It is also possible to rub the screen until the emulsion disappears. Then wash with a lot of water.

Never let the PROCLEAN GEL dry on the screen, the combination of the emulsion and gel is very difficult to get off. Make sure you keep the process of degreasing and coating separately from each other, the vapour coming from the gel condenses on the mesh and give a poor coating adhesion.

4. FIRST AID PROCEDURES

<i>INHALATION:</i>	None.
<i>EYE CONTACT:</i>	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. In the event of persistent irritation or any lesions, consult an oculist.
<i>SKIN CONTACT:</i>	Wash off with soap and water.
<i>INGESTION:</i>	Clean mouth with water. Do not induce vomiting.
