PROCLEAN LIQUID 1/20

Page 1 to 1

Version 2

1. PRODUCT DESCRIPTION

PROCLEAN LIQUID 1/20 is a concentrated reclaiming product.

Shelf life: 2 years at 20°C.

2. APPLICATION

It has been formulated to prevent crystallization in the storage containers. Can be use manually.

3. USE

PREPARATION:

One litter of PROCLEAN LIQUID 1/20 should be diluted in 20 litters of water. In a special cases, you may have to dilute PROCLEAN LIQUID 1/20 in 15 litters of water.

Clean the mesh with a water emulsifiable solvent (PROSOLVE or PROSOLVE SUPER) to make sure that no ink residue is left. Rinse with water. Spread PROCLEAN LIQUID. Leave for about 5 minutes. Wash off with a pressure hose. Never let the liquid dry on the screen because the combination of PROCLEAN LIQUID and emulsion is very difficult to remove.

Make sure the reclaiming process is kept separate from degreasing and coating process, because the condensed vapour from the PROCLEAN LIQUID may partially harden the new screens.

4. FIRST AID PROCEDURES

INHALATION:

None.

EYE CONTACT:

Rinse immediatly with plenty of water, also under the eyelids, for at least 15 minutes.

In the event of persistent irritation or any lesions, consult an oculist.

SKIN CONTACT:

Wash off with soap and water.
