PROCLEAN POWDER

Page 1 to 1

Version 4

1. PRODUCT DESCRIPTION

PROCLEAN POWDER is a white reclaiming powder.

Shelf life: 2 years at 20°C.

2. APPLICATION

PROCLEAN POWDER is a very fast and effective reclaiming powder.

3. USE

PROCLEAN POWDER is used as a water based solution (200 g to 10 litres water). A stronger solution is necessary especially to remove photosensible emulsions with a high solids content. Having cleaned off any remaining ink from the screen, apply the solution evenly on both sides with a brush, leave on for 30 seconds to 2 minutes (according to the type of emulsion used), the rinse off with a high pressure hose.

Never let the liquid dry on the screen because the combination of PROCLEAN POWDER and emulsions is very difficult to remove. Make sure the reclaiming process is kept separate from degreasing and coating, for the condensed vapour from the PROCLEAN POWDER will partially harden the new screens in the same area coated.

4. FIRST AID PROCEDURES

<i>INHALATION:</i>	Take a rest in the open air.
<i>EYES CONTACT:</i>	Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. In the event of persistent irritation or any lesions, consult an oculist.
<i>SKIN CONTACT:</i>	Wash off with soap and water.
<i>INGESTION:</i>	Clean mouth with water. Ask for medical immediately.
